**Notes:**

[1] Entitlement to the software is not included with the subscription plan if the Support Level is blank. The Community 360 plan does not include entitlements to any proprietary software and has been intentionally left blank.

[2] Includes all the extensions and loadable modules found at <https://www.postgresql.org/docs/current/contrib.html> based on software version

[3] EDB Slony is no longer supported beginning with EDB Postgres Advanced Server v14 and PostgreSQL v14

[4] StackbuilderPlus is only distributed and needed when utilizing one-click installers; not a standalone tool

[5] The software listed (if checked) is included in your active EDB subscription and is eligible for break/fix support, which includes insight, guidance, troubleshooting, and, where applicable, technical workarounds related to documented functionality on supported operating systems as defined at <https://www.enterprisedb.com/support>

**Definitions:**

**Guidance & Advice:** EDB will provide insight and guidance for the product as it is understood per EDB's knowledge of the documented behavior and functionality of the software.

**Troubleshooting:** EDB will provide insight, guidance and troubleshooting for the software on approved OS platforms and versions designated at <https://www.enterprisedb.com/product-compatibility>

**Break/Fix:** EDB will provide insight, guidance, troubleshooting, and where possible, a technical workaround as it pertains to the software if necessary, as it relates to functionality and behavior within the official software documentation, on approved OS platforms and versions as designated at <https://www.enterprisedb.com/product-compatibility>. A workaround may consist of technical steps, a software patch or build, however EDB provides no guarantee that any code changes will persist or be maintained in the main open source project.
