

Thank you for your interest in EDB Training & Certification.

For a successful training experience, we require that each participant have access to a laptop/PC/Virtual Machine (VM) with the following set up:

Requirements	Specifications	Notes
User Type	Root user or a normal user with sudo access	Ability to install software & plug-ins as required
Operating System	RHEL/CentOS 7	Standard configuration to eliminate discrepancies
Memory	Minimum- 1GB RAM & 20GB Free Disk Space Recommended - 2GB RAM & 40GB Free Disk Space	Needed to perform labs/exercises 3 VM/PCs are required for High Availability Lab
Internet Access	Wireless Internet/LAN/DSL	Ability to download Postgres binaries & sample database scripts
Firewall/Port Exceptions	Default Port 5432 & 5444 for Postgres; 80 for PEM & pgAdmin	Ability to access database servers using PEM & pgAdmin Web interfaces

Notes:

1. To avoid unnecessary delays, it is highly recommended that each participant confirm that all required devices (speakers, microphone, projectors etc.) are functioning properly in advance.
2. To ensure your training runs smoothly, you must test your connection to the specified Web conferencing tool and install all necessary software and drivers for devices.
3. Each participant attending a live Instructor-led training class will receive instructions and links for installing the latest version of the relevant database along with related tools from training@enterprisedb.com
4. Answer keys will be provided for the training labs.
5. Please contact us via training@enterprisedb.com for any setup related questions.
